CONSTITUTIONAL PROVISIONS

The Supremacy Clause, U.S. Const. art. VI, cl. 2

This Constitution, and the Laws of the United States which shall be made in Pursuance thereof; and all Treaties made, or which shall be made, under the Authority of the United States, shall be the supreme Law of the Land; and the Judges in every State shall be bound thereby, any Thing in the Constitution or Laws of any State to the Contrary notwithstanding.

FEDERAL STATUTES

TITLE 47. Telegraphs, telephones, and radiotelegraphs
CHAPTER 5. Wire or radio communication; general provisions

47 U.S.C. § 251. Interconnection

(a) General duty of telecommunications carriers. Each telecommunications carrier has the duty--

(1) to interconnect directly or indirectly with the facilities and equipment of other telecommunications carriers; and

(2) not to install network features, functions, or capabilities that do not comply with the guidelines and standards established pursuant to section 255 or 256.

(b) Obligations of all local exchange carriers. Each local exchange carrier has the following duties:

(1) Resale. The duty not to prohibit, and not to impose unreasonable or discriminatory conditions or limitations on, the resale of its telecommunications services.

(2) Number portability. The duty to provide, to the extent technically feasible, number portability in accordance with requirements prescribed by the Commission.

(3) Dialing parity. The duty to provide dialing parity to competing providers of telephone exchange service and telephone toll service, and the duty to permit all such providers to have nondiscriminatory access to telephone numbers, operator services, directory assistance, and directory listing, with no unreasonable dialing delays.

(4) Access to rights-of-way. The duty to afford access to the poles, ducts, conduits, and rights-of-way of such carrier to competing providers of telecommunications services on rates, terms, and conditions that are consistent with section 224.

(5) Reciprocal compensation. The duty to establish reciprocal compensation arrangements for the transport and termination of telecommunications.

(c) Additional obligations of incumbent local exchange carriers. In addition to the duties contained in subsection (b), each incumbent local exchange carrier has the following duties:

(1) Duty to negotiate. The duty to negotiate in good faith in accordance with section 252 the particular terms and conditions of agreements to fulfill the duties described in paragraphs (1) through (5) of subsection (b) and this subsection. The requesting telecommunications carrier also

has the duty to negotiate in good faith the terms and conditions of such agreements.

(2) Interconnection. The duty to provide, for the facilities and equipment of any requesting telecommunications carrier, interconnection with the local exchange carrier's network—

(A) for the transmission and routing of telephone exchange service and exchange access;

(B) at any technically feasible point within the carrier's network;

(C) that is at least equal in quality to that provided by the local exchange carrier to itself or to any subsidiary, affiliate, or any other party to which the carrier provides interconnection; and

(D) on rates, terms, and conditions that are just, reasonable, and nondiscriminatory, in accordance with the terms and conditions of the agreement and the requirements of this section and section 252.

(3) Unbundled access. The duty to provide, to any requesting telecommunications carrier for the provision of a telecommunications service, nondiscriminatory access to network elements on an unbundled basis at any technically feasible point on rates, terms, and conditions that are just, reasonable, and nondiscriminatory in accordance with the terms and conditions of the agreement and the requirements of this section and section 252 An incumbent local exchange carrier shall provide such unbundled network elements in a manner that allows requesting carriers to combine such elements in order to provide such telecommunications service.

(4) Resale. The duty--

(A) to offer for resale at wholesale rates any telecommunications service that the carrier provides at retail to subscribers who are not telecommunications carriers; and

(B) not to prohibit, and not to impose unreasonable or discriminatory conditions or limitations on, the resale of such telecommunications service, except that a State commission may, consistent with regulations prescribed by the Commission under this section, prohibit a reseller that obtains at wholesale rates a telecommunications service that is available at retail only to a category of subscribers from offering such service to a different category of subscribers.

(5) Notice of changes. The duty to provide reasonable public notice of changes in the information necessary for the transmission and routing of services using that local exchange carrier's facilities or networks, as well as of any other changes that would affect the interoperability of those facilities and networks.

(6) Collocation. The duty to provide, on rates, terms, and conditions that are just, reasonable, and nondiscriminatory, for physical collocation of equipment necessary for interconnection or access to unbundled network elements at the premises of the local exchange carrier, except that the carrier may provide for virtual collocation if the local exchange carrier demonstrates to the State commission that physical collocation is not practical for technical reasons or because of space limitations.

(d) Implementation.

(1) In general. Within 6 months after the date of enactment of the Telecommunications Act of 1996, the Commission

shall complete all actions necessary to establish regulations to implement the requirements of this section.

(2) Access standards. In determining what network elements should be made available for purposes of subsection (c)(3), the Commission shall consider, at a minimum, whether--

(A) access to such network elements as are proprietary in nature is necessary; and

(B) the failure to provide access to such network elements would impair the ability of the telecommunications carrier seeking access to provide the services that it seeks to offer.

(3) Preservation of State access regulations. In prescribing and enforcing regulations to implement the requirements of this section, the Commission shall not preclude the enforcement of any regulation, order, or policy of a State commission that—

(A) establishes access and interconnection obligations of local exchange carriers;

(B) is consistent with the requirements of this section; and

(C) does not substantially prevent implementation of the requirements of this section and the purposes of this part.

(e) Numbering administration.

(1) Commission authority and jurisdiction. The Commission shall create or designate one or more impartial entities to administer telecommunications numbering and to make such numbers available on an equitable basis. The Commission shall have exclusive jurisdiction over those portions of the North American Numbering Plan that pertain to the United

States. Nothing in this paragraph shall preclude the Commission from delegating to State commissions or other entities all or any portion of such jurisdiction.

(2) Costs. The cost of establishing telecommunications numbering administration arrangements and number portability shall be borne by all telecommunications carriers on a competitively neutral basis as determined by the Commission.

(3) Universal emergency telephone number. The Commission and any agency or entity to which the Commission has delegated authority under this subsection shall designate 9-1-1 as the universal emergency telephone number within the United States for reporting an emergency to appropriate authorities and requesting assistance. The designation shall apply to both wireline and wireless telephone service. In making the designation, the Commission (and any such agency or entity) shall provide appropriate transition periods for areas in which 9-1-1 is not in use as an emergency telephone number on the date of enactment of the Wireless Communications and Public Safety Act of 1999.

(f) Exemptions, suspensions, and modifications.

(1) Exemption for certain rural telephone companies.

(A) Exemption. Subsection (c) of this section shall not apply to a rural telephone company until (i) such company has received a bona fide request for interconnection, services, or network elements, and (ii) the State commission determines (under subparagraph (B)) that such request is not unduly economically burdensome, is technically feasible, and is consistent with section 254 (other than subsections (b)(7) and (c)(1)(D) thereof).

(B) State termination of exemption and implementation schedule. The party making a bona fide request of a rural telephone company for interconnection, services, or network elements shall submit a notice of its request to the State commission. The State commission shall conduct an inquiry for the purpose of determining whether to terminate the exemption under subparagraph (A). Within 120 days after the State commission receives notice of the request, the State commission shall terminate the exemption if the request is not unduly economically burdensome, is technically feasible, and is consistent with section 254 (other than subsections (b)(7) and (c)(1)(D) thereof). Upon termination of the exemption, a State commission shall establish an implementation schedule for compliance with the request that is consistent in time and manner with Commission regulations.

(C) Limitation on exemption. The exemption provided by this paragraph shall not apply with respect to a request under subsection (c) from a cable operator providing video programming, and seeking to provide any telecommunications service, in the area in which the rural telephone company provides video programming. The limitation contained in this subparagraph shall not apply to a rural telephone company that is providing video programming on the date of enactment of the Telecommunications Act of 1996.

(2) Suspensions and modifications for rural carriers. A local exchange carrier with fewer than 2 percent of the Nation's subscriber lines installed in the aggregate nationwide may petition a State commission for a suspension or modification of the application of a requirement or requirements of subsection (b) or (c) to telephone exchange service facilities specified in such petition. The State commission shall grant

such petition to the extent that, and for such duration as, the State commission determines that such suspension or modification--

(A) is necessary--

(i) to avoid a significant adverse economic impact on users of telecommunications services generally;

(ii) to avoid imposing a requirement that is unduly economically burdensome; or

(iii) to avoid imposing a requirement that is technically infeasible; and

(B) is consistent with the public interest, convenience, and necessity.

The State commission shall act upon any petition filed under this paragraph within 180 days after receiving such petition. Pending such action, the State commission may suspend enforcement of the requirement or requirements to which the petition applies with respect to the petitioning carrier or carriers.

(g) Continued enforcement of exchange access and interconnection requirements. On and after the date of enactment of the Telecommunications Act of 1996, each local exchange carrier, to the extent that it provides wireline services, shall provide exchange access, information access, and exchange services for such access to interexchange carriers and information service providers in accordance with the same equal access and nondiscriminatory interconnection restrictions and obligations (including receipt of compensation) that apply to such carrier on the date immediately preceding the date of enactment of the

Telecommunications Act of 1996 under any court order, consent decree, or regulation, order, or policy of the Commission, until such restrictions and obligations are explicitly superseded by regulations prescribed by the Commission after such date of enactment. During the period beginning on such date of enactment and until such restrictions and obligations are so superseded, such restrictions and obligations shall be enforceable in the same manner as regulations of the Commission.

(h) Definition of incumbent local exchange carrier.

(1) Definition. For purposes of this section, the term "incumbent local exchange carrier" means, with respect to an area, the local exchange carrier that--

(A) on the date of enactment of the Telecommunications Act of 1996, provided telephone exchange service in such area; and

(B) (i) on such date of enactment, was deemed to be a member of the exchange carrier association pursuant to section 69.601(b) of the Commission's regulations (47 C.F.R. 69.601(b)); or

(ii) is a person or entity that, on or after such date of enactment, became a successor or assign of a member described in clause (i).

(2) Treatment of comparable carriers as incumbents. The Commission may, by rule, provide for the treatment of a local exchange carrier (or class or category thereof) as an incumbent local exchange carrier for purposes of this section if—

(A) such carrier occupies a position in the market for telephone exchange service within an area that is comparable to the position occupied by a carrier described in paragraph (1);

(B) such carrier has substantially replaced an incumbent local exchange carrier described in paragraph (1); and

(C) such treatment is consistent with the public interest, convenience, and necessity and the purposes of this section.

(i) Savings provision. Nothing in this section shall be construed to limit or otherwise affect the Commission's authority under section 201.

47 U.S.C. § 252. Procedures for negotiation, arbitration, and approval of agreements.

(a) Agreements arrived at through negotiation.

(1) Voluntary negotiations. Upon receiving a request for interconnection, services, or network elements pursuant to section 251, an incumbent local exchange carrier may negotiate and enter into a binding agreement with the requesting telecommunications carrier or carriers without regard to the standards set forth in subsections (b) and (c) of section 251. The agreement shall include a detailed schedule of itemized charges for interconnection and each service or network element included in the agreement. The agreement, including any interconnection agreement negotiated before the date of enactment of the Telecommunications Act of 1996, shall be submitted to the State commission under subsection (e) of this section.

(2) Mediation. Any party negotiating an agreement under this section may, at any point in the negotiation, ask a State commission to participate in the negotiation and to mediate any differences arising in the course of the negotiation.

(b) Agreements arrived at through compulsory arbitration.

(1) Arbitration. During the period from the 135th to the 160th day (inclusive) after the date on which an incumbent local exchange carrier receives a request for negotiation under this section, the carrier or any other party to the negotiation may petition a State commission to arbitrate any open issues.

(2) Duty of petitioner.

(A) A party that petitions a State commission under paragraph (1) shall, at the same time as it submits the petition, provide the State commission all relevant documentation concerning--

(i) the unresolved issues;

(ii) the position of each of the parties with respect to those issues; and

(iii) any other issue discussed and resolved by the parties.

(B) A party petitioning a State commission under paragraph (1) shall provide a copy of the petition and any documentation to the other party or parties not later than the day on which the State commission receives the petition.

(3) Opportunity to respond. A non-petitioning party to a negotiation under this section may respond to the other party's petition and provide such additional information as it

wishes within 25 days after the State commission receives the petition.

(4) Action by State commission.

(A) The State commission shall limit its consideration of any petition under paragraph (1) (and any response thereto) to the issues set forth in the petition and in the response, if any, filed under paragraph (3).

(B) The State commission may require the petitioning party and the responding party to provide such information as may be necessary for the State commission to reach a decision on the unresolved issues. If any party refuses or fails unreasonably to respond on a timely basis to any reasonable request from the State commission, then the State commission may proceed on the basis of the best information available to it from whatever source derived.

(C) The State commission shall resolve each issue set forth in the petition and the response, if any, by imposing appropriate conditions as required to implement subsection (c) upon the parties to the agreement, and shall conclude the resolution of any unresolved issues not later than 9 months after the date on which the local exchange carrier received the request under this section.

(5) Refusal to negotiate. The refusal of any other party to the negotiation to participate further in the negotiations, to cooperate with the State commission in carrying out its function as an arbitrator, or to continue to negotiate in good faith in the presence, or with the assistance, of the State commission shall be considered a failure to negotiate in good faith.

(c) Standards for arbitration. In resolving by arbitration under subsection (b) any open issues and imposing conditions upon the parties to the agreement, a State commission shall--

(1) ensure that such resolution and conditions meet the requirements of section 251 including the regulations prescribed by the Commission pursuant to section 251;

(2) establish any rates for interconnection, services, or network elements according to subsection (d); and

(3) provide a schedule for implementation of the terms and conditions by the parties to the agreement.

(d) Pricing standards.

(1) Interconnection and network element charges. Determinations by a State commission of the just and reasonable rate for the interconnection of facilities and equipment for purposes of subsection (c)(2) of section 251, and the just and reasonable rate for network elements for purposes of subsection (c)(3) of such section --

(A) shall be--

(i) based on the cost (determined without reference to a rate-of-return or other rate-based proceeding) of providing the interconnection or network element (whichever is applicable), and

(ii) nondiscriminatory, and

(B) may include a reasonable profit.

(2) Charges for transport and termination of traffic.

(A) In general. For the purposes of compliance by an incumbent local exchange carrier with section 251(b)(5), a State commission shall not consider the terms and conditions for reciprocal compensation to be just and reasonable unless-

(i) such terms and conditions provide for the mutual and reciprocal recovery by each carrier of costs associated with the transport and termination on each carrier's network facilities of calls that originate on the network facilities of the other carrier; and

(ii) such terms and conditions determine such costs on the basis of a reasonable approximation of the additional costs of terminating such calls.

(B) Rules of construction. This paragraph shall not be construed--

(i) to preclude arrangements that afford the mutual recovery of costs through the offsetting of reciprocal obligations, including arrangements that waive mutual recovery (such as bill-and-keep arrangements); or

(ii) to authorize the Commission or any State commission to engage in any rate regulation proceeding to establish with particularity the additional costs of transporting or terminating calls, or to require carriers to maintain records with respect to the additional costs of such calls.

(3) Wholesale prices for telecommunications services. For the purposes of section 251(c)(4), a State commission shall determine wholesale rates on the basis of retail rates charged to subscribers for the telecommunications service requested, excluding the portion thereof attributable to any marketing,

billing, collection, and other costs that will be avoided by the local exchange carrier.

(e) Approval by State commission.

(1) Approval required. Any interconnection agreement adopted by negotiation or arbitration shall be submitted for approval to the State commission. A State commission to which an agreement is submitted shall approve or reject the agreement, with written findings as to any deficiencies.

(2) Grounds for rejection. The State commission may only reject--

(A) an agreement (or any portion thereof) adopted by negotiation under subsection (a) if it finds that--

(i) the agreement (or portion thereof) discriminates against a telecommunications carrier not a party to the agreement; or

(ii) the implementation of such agreement or portion is not consistent with the public interest, convenience, and necessity; or

(B) an agreement (or any portion thereof) adopted by arbitration under subsection (b) if it finds that the agreement does not meet the requirements of section 251, including the regulations prescribed by the Commission pursuant to section 251, or the standards set forth in subsection (d) of this section.

(3) Preservation of authority. Notwithstanding paragraph (2), but subject to section 253, nothing in this section shall prohibit a State commission from establishing or enforcing other requirements of State law in its review of an agreement, including requiring compliance with intrastate

telecommunications service quality standards or requirements.

(4) Schedule for decision. If the State commission does not act to approve or reject the agreement within 90 days after submission by the parties of an agreement adopted by negotiation under subsection (a), or within 30 days after submission by the parties of an agreement adopted by arbitration under subsection (b), the agreement shall be deemed approved. No State court shall have jurisdiction to review the action of a State commission in approving or rejecting an agreement under this section.

(5) Commission to act if State will not act. If a State commission fails to act to carry out its responsibility under this section in any proceeding or other matter under this section, then the Commission shall issue an order preempting the State commission's jurisdiction of that proceeding or matter within 90 days after being notified (or taking notice) of such failure, and shall assume the responsibility of the State commission under this section with respect to the proceeding or matter and act for the State commission.

(6) Review of State commission actions. In a case in which a State fails to act as described in paragraph (5), the proceeding by the Commission under such paragraph and any judicial review of the Commission's actions shall be the exclusive remedies for a State commission's failure to act. In any case in which a State commission makes a determination under this section, any party aggrieved by such determination may bring an action in an appropriate Federal district court to determine whether the agreement or statement meets the requirements of section 251 and this section.

(f) Statements of generally available terms.

(1) In general. A Bell operating company may prepare and file with a State commission a statement of the terms and conditions that such company generally offers within that State to comply with the requirements of section 251 and the regulations thereunder and the standards applicable under this section.

(2) State commission review. A State commission may not approve such statement unless such statement complies with subsection (d) of this section and section 251 and the regulations thereunder. Except as provided in section 253, nothing in this section shall prohibit a State commission from establishing or enforcing other requirements of State law in its review of such statement, including requiring compliance with intrastate telecommunications service quality standards or requirements.

(3) Schedule for review. The State commission to which a statement is submitted shall, not later than 60 days after the date of such submission--

(A) complete the review of such statement under paragraph (2) (including any reconsideration thereof), unless the submitting carrier agrees to an extension of the period for such review; or

(B) permit such statement to take effect.

(4) Authority to continue review. Paragraph (3) shall not preclude the State commission from continuing to review a statement that has been permitted to take effect under subparagraph (B) of such paragraph or from approving or disapproving such statement under paragraph (2).

(5) Duty to negotiate not affected. The submission or approval of a statement under this subsection shall not relieve a Bell operating company of its duty to negotiate the terms and conditions of an agreement under section 251.

(g) Consolidation of State proceedings. Where not inconsistent with the requirements of this Act, a State commission may, to the extent practical, consolidate proceedings under sections 214(e), 251(f), 253, and this section in order to reduce administrative burdens on telecommunications carriers, other parties to the proceedings, and the State commission in carrying out its responsibilities under this Act.

(h) Filing required. A State commission shall make a copy of each agreement approved under subsection (e) and each statement approved under subsection (f) available for public inspection and copying within 10 days after the agreement or statement is approved. The State commission may charge a reasonable and nondiscriminatory fee to the parties to the agreement or to the party filing the statement to cover the costs of approving and filing such agreement or statement.

(i) Availability to other telecommunications carriers. A local exchange carrier shall make available any interconnection, service, or network element provided under an agreement approved under this section to which it is a party to any other requesting telecommunications carrier upon the same terms and conditions as those provided in the agreement.

(j) Definition of incumbent local exchange carrier. For purposes of this section, the term "incumbent local exchange carrier" has the meaning provided in section 251(h).

47 U.S.C. § 261. Effect on other requirements

(a) Commission regulations. Nothing in this part shall be construed to prohibit the Commission from enforcing regulations prescribed prior to February 8, 1996, in fulfilling the requirements of this part, to the extent that such regulations are not inconsistent with the provisions of this part.

(b) Existing State regulations. Nothing in this part shall be construed to prohibit any State commission from enforcing regulations prescribed prior to February 8, 1996, or from prescribing regulations after February 8, 1996, in fulfilling the requirements of this part, if such regulations are not inconsistent with the provisions of this part.

(c) Additional State requirements. Nothing in this part precludes a State from imposing requirements on a telecommunications carrier for intrastate services that are necessary to further competition in the provision of telephone exchange service or exchange access, as long as the State's requirements are not inconsistent with this part or the Commission's regulations to implement this part.

Telecommunications Act of 1996, Pub. L. 104-104, 110 Stat. 56, 143 (1996).

§ 601(c)(1), Uncodified Note to 47 U.S.C. § 152. Applicability of Consent Decrees and Other Law.

(c) Federal, State, and local law.

(1) No implied effect. This Act and the amendments made by this Act [for full classification, consult USCS Tables volumes] shall not be construed to modify, impair, or

supersede Federal, State, or local law unless expressly so provided in such Act or amendments.

WISCONSIN STATUTES (2001-02)

Chapter 133. Trusts and Monopolies

133.01 Legislative intent. The intent of this chapter is to safeguard the public against the creation or perpetuation of monopolies and to foster and encourage competition by prohibiting unfair and discriminatory business practices which destroy or hamper competition. It is the intent of the legislature that this chapter be interpreted in a manner which gives the most liberal construction to achieve the aim of competition. It is the intent of the legislature to make competition the fundamental economic policy of this state and, to that end, state regulatory agencies shall regard the public interest as requiring the preservation and promotion of the maximum level of competition in any regulated industry consistent with the other public interest goals established by the legislature.

Chapter 196. Regulation of Public Utilities

§ 196.01 Definitions. As used in this chapter and ch. 197, unless the context requires otherwise:

(1b) "Access service" means the provision of switched or dedicated access to a local exchange network for the purpose of enabling a telecommunications provider to originate or terminate telecommunications service. "Access service" includes unbundled local service provided to telecommunications providers.

. . . .

(3b) "Interconnection agreement" means an interconnections agreement that is subject to approval by the commission under 47 USC 252 (e).

§ 196.02 Commission's powers.

(1) Jurisdiction. The commission has jurisdiction to supervise and regulate every public utility in this state and to do all things necessary and convenient to its jurisdiction.

§ 196.03 Utilities charges and service; reasonable and adequate.

(1) Subject to s. 196.63, a public utility shall furnish reasonably adequate service and facilities. The charge made by any public utility for any heat, light, water, telecommunications service or power produced, transmitted, delivered or furnished or for any service rendered or to be rendered in connection therewith shall be reasonable and just and every unjust or unreasonable charge for such service is prohibited and declared unlawful.

. . . .

(6) In determining a reasonably adequate telecommunications service or a reasonable and just charge for that telecommunications service, the commission shall consider at least the following factors in determining what is reasonable and just, reasonably adequate, convenient and necessary or in the public interest:

(a) Promotion and preservation of competition consistent with ch. 133 and s. 196.219.

(b) Promotion of consumer choice.

(c) Impact on the quality of life for the public, including privacy considerations.

(d) Promotion of universal service.

(e) Promotion of economic development, including telecommunications infrastructure deployment.

(f) Promotion of efficiency and productivity.

(g) Promotion of telecommunications services in geographical areas with diverse income or racial populations.

§ 196.04 Facilities granted other utilities; physical telecommunications connections; petition; investigation.

(1)(a) Definitions. In this section:

1. "Transmission equipment and property" means any conduit, subway, pole, tower, transmission wire or other equipment on, over or under any street or highway.

2. "Physical connection" means the number of trunk lines or complete circuits and connections, including connections by wire, optics, radio signal or other means, required to furnish reasonably adequate telecommunications service between telecommunications providers.

(b) Transmission equipment and property access. 1. Any person who owns transmission equipment and property shall permit, for reasonable compensation, the use of the transmission equipment and property by any public utility or telecommunications provider if public convenience and necessity require such use and if the use will not result in

irreparable injury to any owner or user of the transmission equipment and property or in any substantial detriment to the service to be rendered by the owner or user.

2. Every telecommunications utility shall permit physical connections to be made, and telecommunications service to be furnished, between any telecommunications system operated by it and the telecommunications toll line operated by another telecommunications provider, or between its toll line and the telecommunications system of another telecommunications provider, or between its toll line and the toll line of another telecommunications provider, or between its telecommunications system and the telecommunications system of another telecommunications provider if all of the following apply:

a. Public convenience and necessity require the connection.

b. The connection will not result in irreparable injury to the owners or other users of the facilities of the public utility making the connection.

c. The connection will not result in any substantial detriment to the service to be rendered by a public utility making the connection.

(2) If there is a failure to agree upon use of transmission equipment and property under sub. (1) or the conditions or compensation for the use, or if there is a failure to agree upon the physical connections or the terms and conditions upon which the physical connections shall be made, any public utility, any telecommunications provider or any other person interested may apply to the commission. If, after investigation, the commission determines that public convenience and necessity require the use or physical connections and that the use or physical connections will not

result in irreparable injury to the owner or other users of the transmission equipment and property or of the facilities of the public utility or in any substantial detriment to the service to be rendered by the owner or the public utility or other users of the transmission equipment and property or facilities, the commission, by order, shall direct that the use be permitted and that the physical connections be made. The commission shall prescribe reasonable conditions and compensation for the use and shall determine how and within what time the connections shall be made and by whom the expense of making and maintaining the connections shall be paid. An order under this subsection may be revised by the commission.

(4)(a) In this subsection:

1. "Cable operator" has the meaning given in s. 66.0419(2)(b).

2. "Sewerage system operator" means any of the following:

a. A municipality that operates a sewerage system under s. 66.0821.

b. A town sanitary district commission that operates a sewerage system under 60.77(4).

c. A city or village that obtains a sewerage system under s. 60.79.

d. A metropolitan sewerage district commission that operates a sewerage system under s. 200.11(2) or 200.31(1).

e. A public inland lake protection and rehabilitation district that exercises the powers of a town sanitary district under s.

33.22(3) and that operates a sewerage system under s. 60.77(4).

(b) If the parties cannot agree and the commission finds that public convenience and necessity or the rendition of reasonably adequate service to the public requires that a public utility, telecommunications provider, sewerage system operator or cable operator be permitted to extend its lines on, over or under the right-of-way of any railroad, or requires that the tracks of any railroad be extended on, over or under the right-of-way of any public utility, telecommunications provider, sewerage system operator or cable operator, the commission may order the extension by the public utility, telecommunications provider, sewerage system operator, cable operator or railroad on, over or under the right-of-way of the other if it will not materially impair the ability of the railroad, telecommunications provider, sewerage system operator, cable operator or public utility, on, over or under whose right-of-way the extension would be made, to serve the public. The commission shall prescribe lawful conditions and compensation which the commission deems equitable and reasonable in light of all the circumstances.

196.196 Telecommunications utility price regulation.

(2) Price regulation of intrastate access services. (a) Except as required to enforce this subsection, the commission may not review or set the rates for intrastate access services offered by price-regulated telecommunications utilities. This paragraph does not waive the tariff requirements of s. 196.219 (2m).

§ 196.199 Interconnections agreements.

(2) Commission powers. (a) The commission has jurisdiction to approve and enforce interconnection agreements and may do all things necessary and convenient to its jurisdiction.

196.20 Rules on service; changes in rates.

(1) The rate schedules of any public utility shall include all rules applicable to the rendition or discontinuance of the service to which the rates specified in the schedules are applicable. No change may be made by any public utility in its schedules except by filing the change as proposed with the commission. Except for a telecommunications utility, no change in any public utility rule which purports to curtail the obligation or undertaking of service of the public utility shall be effective without the written approval of the commission after hearing, except that the commission, by emergency order, may make the rule, as filed, effective from the date of the order, pending final approval of the rule after hearing.

§ 196.219 Protection of telecommunications consumers.

(1) Definitions. In this section:

(a) "Consumer" means any person, including a telecommunications provider, that uses the services, products or facilities provided by a telecommunications utility or the local exchange services offered by a telecommunications provider that is not a telecommunications utility.

(b) "Local exchange service" has the meaning given in s. 196.50 (1) (b) 1.

(2) Consumer protection. (a) Notwithstanding any exemptions identified in this chapter except s. 196.202, a

telecommunications utility or provider shall provide protection to its consumers under this section unless exempted in whole or in part by rule or order of the commission under this section. The commission shall promulgate rules that identify the conditions under which provisions of this section may be suspended.

(b) On petition, the commission may grant an exemption from a requirement under this section upon a showing that the exemption is reasonable and not in conflict with the factors under s. 196.03(6).

(c) On petition, the commission may grant an exemption from a requirement under this section retroactively if the application of the requirement would be unjust and unreasonable considering the factors under s. 196.03(6) or other relevant factors.

(d) If the commission grants an exemption under this subsection, it may require the telecommunications utility or provider to comply with any condition necessary to protect the public interest.

(2m) Access services. A telecommunications utility or provider shall provide access services under tariff under the same rates, terms and conditions to all telecommunications providers, except that a provider is not obligated to provide to competitors access to dedicated access services provided to end user customers as part of an interexchange service.

(3) Prohibited practices. A telecommunications utility with respect to its regulated services or any other telecommunications provider with respect to its offering of local exchange services may not do any of the following:

(a) Refuse to interconnect within a reasonable time with another person to the same extent that the federal communications commission requires the telecommunications utility or provider to interconnect. The public service commission may require additional interconnection based on a determination, following notice and opportunity for hearing, that additional interconnection is in the public interest and is consistent with the factors under s. 196.03 (6).

. . . .

(c) Impair the speed, quality or efficiency of services, products or facilities offered to a consumer under a tariff, contract or price list.

. . . .

(em) Refuse to provide a service, product or facility, in accord with that telecommunications utility's or provider's applicable tariffs, price lists or contracts and with the commission's rules and orders, to another telecommunications provider.

(f) Refuse to provide basic local exchange service, business access line and usage service within a local calling area and access service on an unbundled basis to the same extent that the federal communications commission requires the telecommunications utility or provider to unbundle the same services provided under its jurisdiction. The public service commission may require additional unbundling of intrastate telecommunications services based on a determination, following notice and opportunity for hearing, that additional unbundling is required in the public interest and is consistent with the factors under s. 196.03 (6). The public service

commission may order unbundling by a small telecommunications utility.

. . . .

(h) To the extent prohibited by the federal communications commission, or by the public service commission under rules promulgated consistent with the factors under s. 196.03 (6), give preference or discriminate in the provision of services, products or facilities to an affiliate, or to the telecommunications utility's or provider's own or an affiliate's retail department that sells to consumers.

. . . .

(l) Fail to provide, or to terminate, any telecommunications service as necessary to comply with the minimum standards of service established by the commission with respect to technical service quality, deposits, disconnection, billing and collection of amounts owed for services provided or to be provided.

. . . .

(4) Enforcement. (a) On the commission's own motion or upon complaint filed by the consumer, the commission shall have jurisdiction to take administrative action or to commence civil actions against telecommunications utilities or providers to enforce this section.

(b) The commission may, at its discretion, institute in any court of competent jurisdiction a proceeding against a telecommunications utility or provider for injunctive relief to compel compliance with this section, to compel the accounting and refund of any moneys collected in violation of this section or for any other relief permitted under this

chapter.

(4d) Unfair trade practice enforcement. Upon receipt of a notice issued under s. 100.208, the commission may order a telecommunications provider to cease offering the telecommunications service that creates the unfair trade practice or method of competition.

(4m) Civil actions. (a) Upon a finding of a violation of this section by the commission, any person injured because of a violation of this section by a telecommunications utility or provider may commence a civil action to recover damages or to obtain injunctive relief.

(b) Upon request of the commission, the attorney general may bring an action to require a telecommunications utility or provider to compensate any person for any pecuniary loss caused by the failure of the utility or provider to comply with this section.

196.37 Lawful rates; reasonable service.

(2) If the commission finds that any measurement, regulation, practice, act or service is unjust, unreasonable, insufficient, preferential, unjustly discriminatory or otherwise unreasonable or unlawful, or that any service is inadequate, or that any service which reasonably can be demanded cannot be obtained, the commission shall determine and make any just and reasonable order relating to a measurement, regulation, practice, act or service to be furnished, imposed, observed and followed in the future.
